Association Mtsodneli

Innovation Research Center

NGO Profile

Center is providing trainings, conferences and workshops, exchange programs and summer camps. The programs are designed to meet specific needs.

We provide Professional Development courses, conferences and workshops. The mission of the Association Mtsodneli is to cultivate and empower interested participants, NGO Leaders, mid-career professionals, teachers, educators to make the world better place to live. We focus on education and adult learning to increase the civic participation and social cohesion. We support Education reform in Georgia. We help interested individuals to actively participate in a professional work environment to develop capacities and skills.

Association Mtsodneli – Innovation Research Center have been developed over many years. Our activities focus on special outcomes, developing new skills of addressing at specific issues and challenges that arise on day to day basis. Our networking with international NGOs gives us the opportunity to share experience and skills with each other. We are open to have new partner organizations in our circle and achieve the goals together.

The main members of organization are educators, teachers, university lecturers and students of Georgia. We provide teachers to establish new professional standards at schools and universities. These trainings provide a clear vision of the knowledge, performances and dispositions that teachers and schools leaders need to support the learning. Professional Development Trainings for educators illustrate the wide range of knowledge and abilities contemporary educators must possess to provide high quality instruction and support to improve student's results.

Association Mtsodneli – Innovation Research Center also publishing the books. The main topic we promote at schools are norms and behavior of the students at schools on elementary level. Under this topic we published the book "Cultural Behaviour" – for school children. We work for stronger communities when young people have greater confidence and skills and a belief in their ability to improve their opportunities in life.

Association Mtsodneli – Innovation Research Center has branches almost all regions in Georgia. We are also open to any partnership and joint projects. Please contact us to join our network.
